**PILONIDAL SINUS WOUNDS**

**Abrasion, leg**
Fast pain reduction because the oil film prevents the wound from desiccation. Complete wound healing within 2 weeks after injury.

**Burn, leg**
Fast pain reduction. The burn healed within 10 days without scar formation. **WOUND** was applied daily and the wound was initially covered with a plaster.

**Rhagade**
Skin crack after intense use of hands in winter. Soft and intact skin after a few days. **WOUND** has been applied several times per day and the rhagade covered with a plaster during phases of intense usage of hands.

**WOUND** is an all-in-one wound healing product, specially formulated from a synergistically acting combination of Neem oil, St. John’s Wort oil and Olive oil.

**WOUND** is suitable for the self-treatment of abrasions, cuts, burns, non healing wounds and skin defects associated with different types of skin disorders.

**WOUND** is a 100% natural, preservative-free product enabling a non-toxic, painless non-touch application.

Injured parchment skin

Delayed wound healing of parchment skin (dry, thin skin caused by drug therapies). Wound healed within 4 weeks with stable skin quality.

Jellyfish burn

Very strong irritation and burn-like symptoms after contact with jellyfish. Fast reduction of pain and irritation and complete wound healing within 3 weeks.

Skin defects

Damaged, dry skin associated with different types of skin disorders.

**WOUND** promotes wound healing and supports skin regeneration and can thereby contribute to the alleviation of symptoms.

**WOUND** does not replace the causal therapy of the skin disorder. Skin disorders have to be treated by a medical doctor.

**WOUND** is available in pharmacies. Please read the package insert before using **WOUND**.
